March 2019, No. 146

Punxsutawney Phil did not see his shadow on **Groundhog Day** (February 2nd) which, according to legend,

predicts an early spring. In hopes that his prediction is accurate, I am optimistic that more sunshine and warmer weather is on its way. I took a brief dive into the origins of Groundhog Day and learned more than I had expected about the evolution of this current-day tradition that marks the mid-point between the Winter Solstice and the Spring Equinox. Origins include a Celtic festival,

an early Christian festival of light called Candlemas, German settlers bringing this festival to America, and Delaware Indians considering groundhogs to be "honorable ancestors." If your curiosity is peaked, read more about it on the Stormfax Weather Almanac website http://www.stormfax.com/ghogday.htm and the Old Farmer's Almanac website https://www.almanac.com/content/groundhog-day-history- meaning-folklore . But I digress. While groundhogs have been hibernating, CAHSLA's Program Committee has been wide-awake and busy. Amy Koshoffer took the lead in planning the February 20th winter meeting. A tour of the UC Geology Specimen

collection and a demo of the UC Viz Lab Wall was well received. Planning for a spring meeting is well underway so keep your eyes open for a program flyer! As the program year continues to progress, some program ideas could not come to fruition but committee members have adjusted quickly to pursue other ideas. Their flexibility, perseverance, and wealth of program ideas are very much appreciated! CAHSLA values its members and welcomes feedback, ideas and concerns. Are you interested in more professional development opportunities? Is there a library or other interesting local spot you are

interested in touring? Feel free to contact me or other Executive Board members. President: Edith Starbuck, Vice President/President Elect: Emily Kean, Treasurer: Cara Yurkowski, and Secretary: Jennifer Pettigrew. Looking forward to seeing you at upcoming CAHSLA programs! Edith Starbuck, President

Respectfully submitted by Cara Yurkowski, Treasurer WHITE MY WITH MALE

Steven Pfeiffer, Amanda Fay, Jennifer Steinhardt, Shawntel Ensminger,

On a rainy evening, CAHSLA met in the Geology-Mathematics-Physics

2019 5:00-7:30 pm Attendees: Amy Koshoffer, Jennifer Pettigrew, Emily Kean, Edith Starbuck,

Library at the University of Cincinnati for a demo of the Viz Wall led by Dr. Craig Dietsch, Professor of Geology. Dr. Dietsch uses the Viz Wall, or Visualization Wall, as a teaching aid in his classes to visualize rock sample data. I was late to his presentation, so I might have missed other noteworthy pieces of information. Afterward, Dr. Michelle Frame, explained that she was only three weeks into starting her position to record everything in the UC Geology Specimen collection over the course of the coming year because their main storage room is to be repurposed as a

The main storage room currently consists of rows of double-stacked metal cabinets containing pull-out shelves with specimens, some of which are

museum quality showstoppers. Labels and documentation are often sparse, so Dr. Frame is also reaching out to former professors, students, and the Cincinnati Museum Center to reunite collections with their owners or at least to learn more about the collections' provenance. The Geology Department must then decide what it wants to keep and what it wants to discard because they will not be gaining space elsewhere. Naturally Dr. Dietsch and Dr. Frame had many questions for our archivists and librarians about how to tackle this project and make collection management decisions. We also toured two additional rooms with geology specimens. The conversation continued while our hosts joined us for box dinners from DiBella's.

Meeting Invitation

A big thanks to Amy Koshoffer for organizing this interesting event!

Submitted by: Jennifer Pettigrew, Secretary

When? Wednesday April 24th at HINEGEL 5:30pm. What? Join your CAHSLA

colleagues for a Tour of Rhinegeist Brewery! Rhinegeist CINCY Brewery is located in historic Over the Rhine (1910 Elm St, Cincinnati, OH 45202, USA).

After the free tour, we will gather at a table and eat while updating each other on CAHSLA-related news.

us for the post-tour food & chat portion of the event. Food details still

MADE

CAHSLA Colleagues Kudos Congratulations Koshoffer who was recently the featured speaker at the University of Louisville Data Management Event. "Come learn about Research Data

Management from a librarian who has helped develop one of the most robust data management programs in the region! The Kornhauser Library is proud to sponsor an upcoming Data Management event featuring Amy

Koshoffer, Science Informationist at the University of Cincinnati. Ms. Koshoffer will be visiting the University of Louisville's Ekstrom Library to help share her experience in providing data services in an academic

setting. Amy will be giving two presentation on March 4th that are open to anyone interested in learning more about running a successful research

to come. Please put in your RSVP status by clicking on the link to this
